EDUCATION

Indian School of Business | PGP (Intended Majors: IT Management and Strategy & Leadership) — Apr 2026 - Present

- **Learning & Development Coordinator, Women in Business Club:** Co-executed skill-building strategy and speaker events for a **400+ student cohort**
  - Boosted **attendee satisfaction (90% to 98%)** across 8 WIB events by **analyzing user feedback** to **iteratively optimize** product and session structure
  - Drove record turnout **(120+ attendees)** for a 7-member **C-suite speaker panel** (Blinkit, Moxie), facilitating student mentorship and networking
  - **Website:** Conceptualized and launched a **centralized digital portal**, streamlining event discovery, learning resources and networking workflows
- **SEED Rural Immersion, Sikkim:** Designed and presented a drone agri-monitoring strategy to the Governor to resolve crop forecasting and pest detection gaps
- **Product Strategy, Medius Earth (Ongoing ELP):** Pioneered **agentic-AI** portal product strategy, defining a roadmap targeted to boost tracking accuracy by 15%
  - Authored PRDs and build-vs-buy frameworks, aligning agentic-AI feature specs to solve end-to-end workflows across **8 stakeholder groups**
- **National Finalist, IIM Indore Prabodhan (top 10/1K):** Formulated a ₹225Cr scaling GTM strategy delivering 11% EBITDA margin via sub-₹2,500 fusion wear

St. Xavier's College | Kolkata | B.Sc. Computer Science (Honours) | CGPA 8.68/10 — Jul 2019 - Jun 2022

- **Speech Emotion Recognition | ML Research & Web Application (Decision Tree, Random Forest, CNN)**
  - Authored a paper achieving **~70%** speech emotion classification accuracy through structured evaluation pipelines and iterative model fine-tuning
  - Built a **user-facing web application** for real-time speech emotion recognition, translating complex ML research into an intuitive consumer UI
- **Event Head, Exabyte '22:** Organized a flagship inter-college debate for 100+ participants across 15+ institutions, driving end-to-end outreach and execution

WORK EXPERIENCE — 3 Years 9 Months

D. E. Shaw India | Member, Tech Ops | Hyderabad — Jul 2022 - Apr 2026

Managed technology operations for ~4,000 users across 15 global offices, 5 time zones and ~200 business-critical third-party and internal applications

Workflow Automation & User Experience

- Saved **~50 hrs/yr** and eliminated manual setup overhead for **~600 users** by integrating **Slack lifecycle onboarding** with centralized Active Directory
  - Mapped eligibility logic to core identity infrastructure, **eliminating repeat access requests** and ensuring seamless zero-touch account activation
- Reduced resource scheduling handling time by **90% (2 hrs to <15 min)** by auditing ticket demand patterns and automating meeting room reservation process
  - Launched **one-click cancellation and rebooking** for **~200 meetings/month** by scripting an end-to-end data fetch and email notification workflow
- Saved **~550 hrs/yr** across ~175 daily tickets by designing and shipping a **roster-aware ticket routing engine** that eliminated manual schedule checks
  - Scaled adoption across shifts in **5 global time zones**; integrated **leave-detection logic** to route tickets to available local on-call engineers, reducing errors
- Reduced alert latency by **75% (8 min to 2 min)** and saved **~50 hrs/yr** by designing, building and launching a custom Slack broadcasting tool for global support
  - Drove adoption across **35 SysAdmins and executive stakeholders** via product demos, engineering custom markup templates to enforce UI clarity
- Prevented silent access failures across **~8,000 workstations and VMs** by expanding an **endpoint health-monitoring platform** with automated integrity checks
  - Eliminated **~60 min of potential daily downtime** by proactively detecting and **resolving ~20 remote-access failures** prior to market opening
- Reduced preparation time for weekly workstation maintenance by **~50%** by architecting a dynamic **location-aware Active Directory grouping pipeline**
  - Synced **real-time seating data** with directory services to remove manual target mapping, standardizing recurring IT maintenance operations

Platform Programs & Stakeholder Leadership

- Achieved **100% milestone compliance** for Arcesium's **corporate spin-off** from D. E. Shaw, **leading a 35-member team** on SysAdmin delivery across ~6 months
  - Steered engagement across **20+ SVPs** to define domain access models, bridging Engineering and Management to establish **cross-firm governance**
  - Ensured **100% business continuity** by provisioning **~500 vendor and third-party accounts**, enforcing role-based access models during system migration
  - Standardized account setup procedures by authoring **enterprise SOPs** and training **30 team members**, driving operational consistency across global team
- Spearheaded **~75% (~3,750 mailboxes)** of the firm's **Exchange Online migration** in ~6 months, leading regional execution to enable **zero-downtime** cutovers
  - Managed **2 direct reports** and aligned global engineering teams, sequencing migration waves to deliver **100% of department cutovers on schedule**
  - Established rigorous validation checks, maintaining **>98% data integrity** across all mailboxes to prevent loss of business-critical communications
  - Cut SysAdmin onboarding time by **~88% (4 hrs to 30 min)** by publishing a **reusable migration playbook** to standardize global deployment handoffs
- Orchestrated the **Windows 11 enterprise rollout** across **8 departments (~200 users)** over 4 months, ensuring **zero operational downtime** for core teams
  - Coordinated **4 vendors** to resolve **50+ licensing issues** across ~10 business-critical applications, mitigating platform compatibility risks proactively
  - Cleared **100% of tracked migration blockers** ahead of cutover, achieving complete rollout on schedule prior to Windows 10 platform deprecation

Platform Efficiency & Reliability

- Standardized ~50 mail groups to a **country-level architecture**, resolving **legacy routing bottlenecks** and enabling multi-site expansion with zero outages
- Increased user satisfaction **(3.5 to 4.8/5)** for ~200 Finance users by serving as **sole SysAdmin POC** and streamlining OS, application and productivity workflows
- Evaluated **~30 software packages** across a ~4,000-user base, blocking **~10 high-risk tools** to protect enterprise security and prevent platform vulnerabilities
- Reduced monthly roster planning time by **~90% (5 hrs to 30 min)** by diagnosing key bottlenecks and modeling complex scheduling constraints
- **Audited technical debt** across **~5,000 legacy directories** and mapped dependencies, drafting a deprecation plan accepted into the backlog by leadership
- Mitigated trading risk across **~30 critical incidents and firm-wide outages** by assembling cross-functional on-call teams and managing communications

Key Achievements

- **Promoted from Associate to Member in 2 years (vs. 2.5-year avg)** for driving firm-wide cloud migrations and key digital transformation initiatives
- **Selected (1/35)** as the SysAdmin team's **sole PowerShell subject-matter expert**, building **15+ PowerShell workflow tools** to streamline tech operations
  - Cut escalations by **40% (10 to 6 tickets/week)** by upskilling **~20 new hires** across two batches on PowerShell and enterprise infrastructure

EXTRACURRICULARS & LEADERSHIP

Leadership & Achievements

- **Indian National Space Settlement Design Competition (INSSDC):** Top **25/200 nationally**; led a 12-member team to conceptualize a lunar settlement
- **Professional:** Mentored 5 new hires on technical and career development, leveraging leadership exposure via **D. E. Shaw's Women's Affinity Group**
- **Student Council (Prefect, Vice-Captain, Captain):** Led **500+ students** and structured team strategy for 75 athletes, winning the annual trophy

Social Impact Initiatives

- Developed backend database for a COVID resource website with a **15-member team**, enabling real-time updates and reaching 1,000+ daily visitors
- Conducted an **interactive arts workshop** for 30+ underprivileged students, designing creative modules to drive **COVID-19 health safety awareness**

Skills & Certifications

- **Technical Skills:** Python, PowerShell, Bash, SQL, Prompt Engineering, Microsoft 365, Enterprise Applications, Infrastructure & Networking, Virtualization
- **Certifications:** Intro to Machine Learning and Pandas - Kaggle; Data Science and Machine Learning with Python - Udemy
